[REDACTED] — X7583  
Chairman, Committee on Imagery  
Requirements and Exploitation

Dear [REDACTED] 25X1A

I have been advised that a significant backlog of DIA requests to the Sanitization and Decontrol Working Group has developed. Most are considered routine in nature and include requests for release of DIA furnished intelligence containing TK data. As far as I can determine, they do not require extensive time or research to complete action. A list of pending requests is attached.

As some of these requests are now long-standing, DOD components are appropriately pressing for early COMIREX/USIB action. I would appreciate your personal support in seeing what can be done to alleviate this situation. I would also appreciate any action you might take to expedite similar requests of this nature in the future.

Sincerely,

25X1A
